Markings in the table above:
* PVC grille similar to RAL 8004
** PVC grille similar to RAL 8014
*** PVC grille similar to RAL 8014

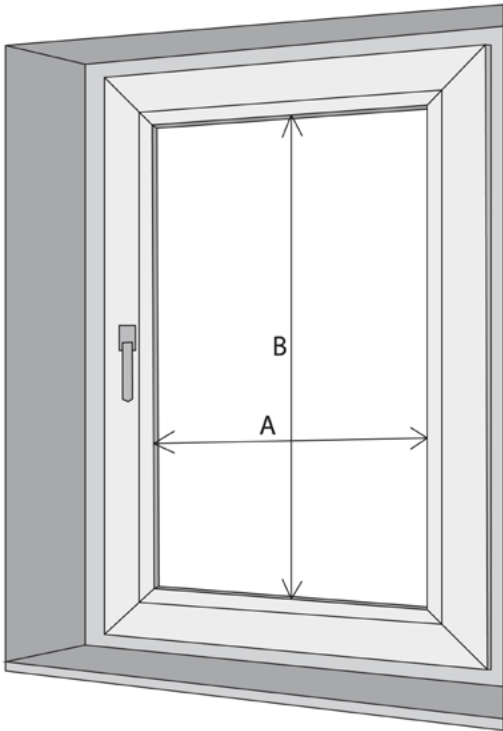

Attention:
The colours of slats in the patterns are illustrative colours, individual batches of products may differ in shades.
Differences in the shades of the slats do not constitute grounds for complaint.

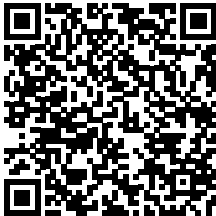

Measurement

For ordering, specify the size of the glass including gaskets.

Installation at the glass consists of screwing the blinds to the glazing bead with screws. As parameters for valuation and performance we accept:
A - Width of the glass including seals,
B - Height of the glass including gaskets.

11	Walnut	120
12	Ebony	121
13	Green	

Attention:

The colours of the feathers in the patterns are reference colours, individual batches of products may differ in shades. Wood, as a natural material, can behave differently under changing conditions. The slats may deform depending on the place where the curtain is used. This situation is most common in rooms with higher humidity (bathroom, kitchen) and where there are large temperature fluctuations (conservatories). However, this is a natural process. Due to the nature of wooden blinds, differences in the shades of the slats, minor chipping of the varnish and minor deformations are acceptable. These do not constitute grounds for complaint.

Front cover with side covers at request (no extra charge).

18	Ebony	121	black				
19	Ash	123	anthracite				

Attention:
The colours of the slats in the patterns are reference colours, individual batches of products may differ in shades. Wood, as a natural material, can behave differently under changing conditions. The slats may deform depending on the place where the curtain is used. This situation is most common in rooms with higher humidity (bathroom, kitchen) and where there are large temperature fluctuations (conservatories). However, this is a natural process. Due to the nature of wooden blinds, differences in the shades of the slats, minor chipping of the varnish and minor deformations are acceptable. These do not constitute grounds for complaint.

Cord ladder

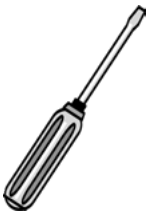

Tape ladder

Measurement

- For ordering, please specify the width and height after the outer contour of the product.

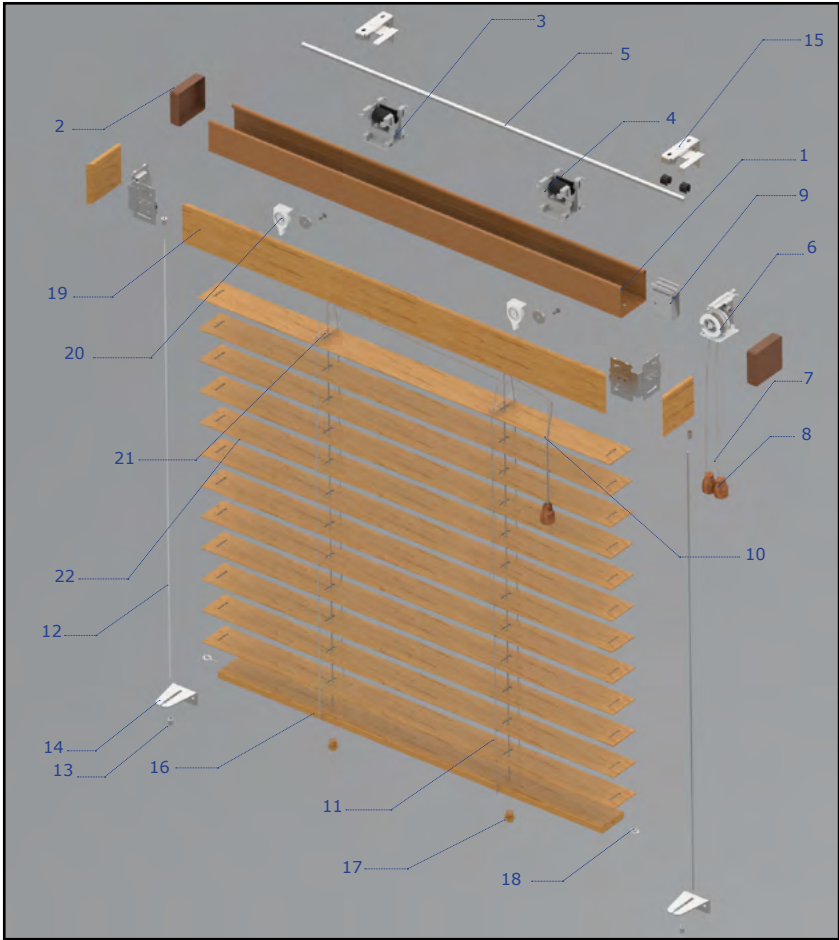

Assembly

Horizontal bamboo blinds 50 mm

- 1. Top rail (D.51 x H.58 mm)
- 2. Top rail plug
- 3. Bearing
- 4. Ladder attachment "9"
- 5. Steel rod

- Attention:**
- As standard, the roller shutter is equipped with a manual - chain drive. Electric drive with selected control system available at an extra charge.
 - In roller blinds with large areas, it is necessary to join the fabric with a weld (always horizontally), which is not always feasible in the case of patterned fabrics.
 - It is recommended look at the fabrics against the light to avoid colour illusions. The colours of fabrics in the samples books are illustrative colours, individual batches of products may differ in shades. Colour differences in the shades of fabrics do not constitute grounds for complaint.

4,0	388	456	523	590	658	725	792	859									

Attention:

- The total dimension is taken for pricing.
- The price of a roller shutter exceeding a given dimension is included in the higher range.
- Roller blinds which exceeds the width and height of the fabric (A0 - 180cm, others of the group A and C - 200cm) have a fabric that consists of 2 parts welded together always horizontally.
- Roller blinds made of fabrics with oriented patterns from the group A5, A6, B3 have a maximum height of 180 cm. Over this height the fabric is cut from the length, which involves turning the pattern by 90 degrees.
- The table contains only price ranges. In the selection of dimensions, please follow the technical data.
- Roller blind material is narrower than the total dimension by an amount that depends on the type of roller blind - see the table "Technical information" p.65.

Extra charges for Largo M, L free-hanging roller blinds

Printing on fabric (minimum conversion area of 1 m2)	73,60 €/m² of printed area
Visualization of the print	24,50 €

Attention:

- The price of a roller exceeding a given dimension is included in the higher range.
- Roller shutters with a width of less than 0.5 m are counted as 0.5 m.
- Blinds in cassettes are recommended to be used with materials from groups A and C. The use of materials from group B is possible, but there is a risk that the layer of gummed fabric will stick to the glass, causing damage to the fabric.
- Roller blinds made of fabrics with directed patterns from the group A5, A6, B3 have a standard height of 180 cm, over this height the fabric is cut from the length, which involves turning the pattern by 90 degrees.
- As standard, the weights is cut at an angle of 90 degrees. If the glazing bead is decorative or at a steep slant, in the Passionata roller shutter we can cut the weights at an angle of 45 degrees (it is not possible to use weights caps). This should be noted in the order.

Measurement

- K - distance between the ends of the side of the glazing beads
- S - width of the glass including seals
- H - height of the roller blind - distance between the ends of the glazing beads
- G - depth of glass seating in relation to the window frame

Dimensions accepted for pricing:

- K - width*
- S - width of the glass including seals
- H - distance between the ends of the glazing beads
- G - depth of glass seating in relation to the window frame (minimum 11 mm)
- * If K - S less than or equal to 44 mm - a guide (30x1 mm) is used
- * If K - S higher than 44 mm - a guide (37x1 mm) is used

Attention:

The the width inside of the "S" is not equal to the width of the fabric.

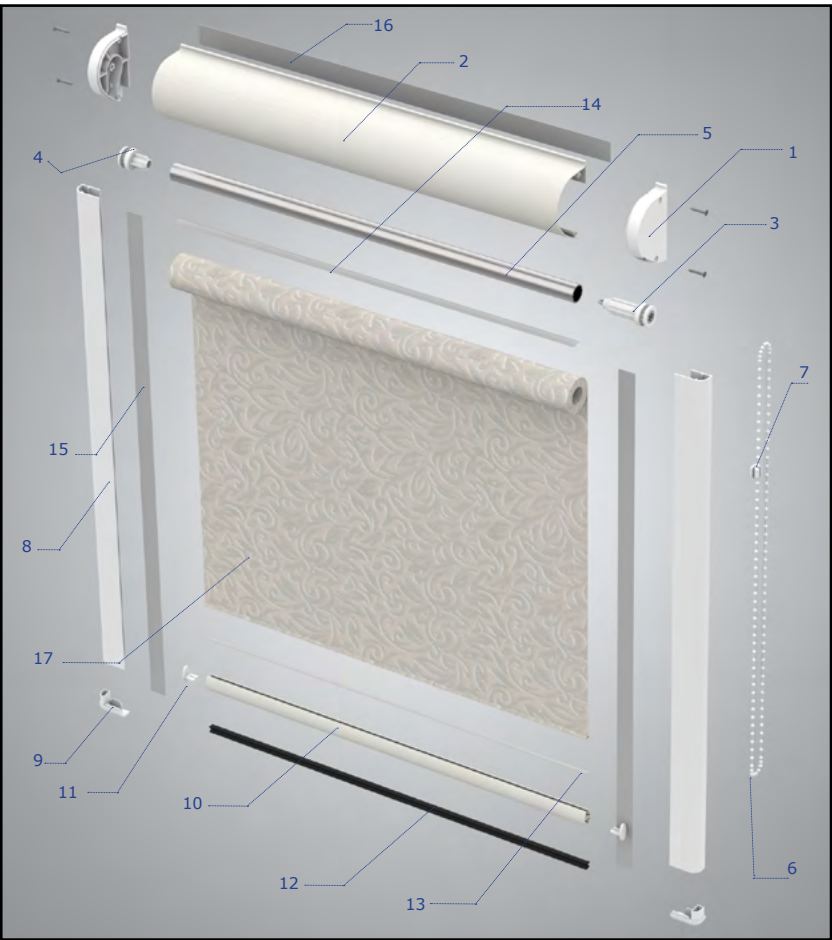

In the order, you can specify an additional dimension - the width of the material.

Assembly

SUITA roller blind in a cassette

1. Side of the cassette
2. Cassette (H.70 x D.45 mm)
3. Mechanism

	beige	RAL 1015
	brown	RAL 8017
	grey	RAL 7040
	anthracite	RAL 7016
Colour of cassette, weights, guides - woodengrain veneer, PVC elements similar to RAL without structure	golden oak	R2178001
	walnut	R2178007
	light oak (natural)	R3167011
	dark oak (rustikal)	R3149008
	mahogany	R2097013
	winchester	R49240
	swamp oak	2052089-167

Attention:

- We recommend using the SUITA roller for PVC windows with a smooth surface. If you use the roller for PVC windows with woodengrain veneer with a "thick" texture or for wooden windows, we are not responsible if the profiles peel away from the window.
- It is recommended to view fabrics against the light to avoid colour illusions.. The colours of fabrics in the samples books are reference colours, individual batches of products may differ in shades. Colour differences in shades of fabrics do not constitute grounds for complaint.

-  **Attention:**
- The price list applies to complete roller blinds with guidance rails and manual drive, with fabric from group A0, A1 or A2.
 - The price of a roller shutter exceeding a given dimension is included in the higher range.
 - Roller shutters with a width of less than 0.5 m are counted as 0.5 m.
 - Roller blinds made of fabrics with directed patterns from the group A5, A6, B3 have a maximum height of 180 cm, above this height the fabric is cut from the length, which involves turning the pattern by 90 degrees.

Extra charges for blinds in Suita cassette

Printing on fabric (minimum conversion area of 1 m2)	73,60 €/m² of printed area
Visualization of the print	24,50 €
Mini chain weights (white and brown)	0,40 €/pc
Universal chain weights (white, beige, brown, anthracite)	0,40 €/pc
Chain tensioner (white and brown)	1,00 € /pc
Suita - non-invasive hangers 3k=14 mm, 4k = 19 mm, 5 k = 24 mm (white)	1,80 €/set
Suita - 3k = 14 mm, 4k = 19 mm, 5k = 24 mm (blackened) brazeless hangers	1,40 €/set
Suita - extra charge for woodgrain colour	+ 24,30 € rm/total width
Painting of aluminum elements (cassette, weights) in any RAL colour*	10,00 €/rm width
Painting of aluminum elements (guides) in any RAL colour*	5,90 €/rm height

-  Note: Painting of elements extends the lead time, PVC elements in standard colour
- *Set of colours with a standard extra charge - page 161. Painting in other colours - individual pricing. Non-invasive hangers are not used with cassettes in RENOLIT veneer.

Measurement

Fabric roller blinds with chambered guides are mounted on the window sash frame.

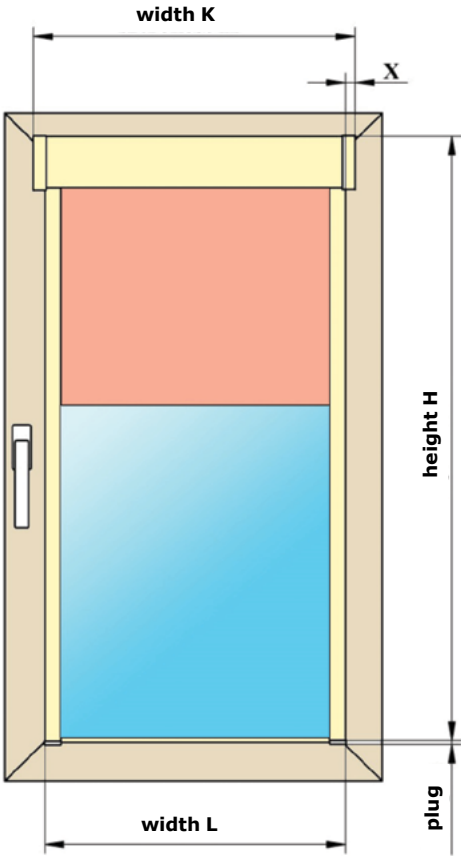

A flat bonding surface (20mm) is required for the cassette and for each guide.

Dimensions accepted for pricing:

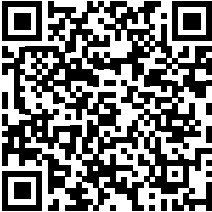

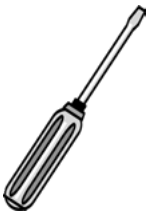

- L - width
- H - height

Attention:

- The height of the cassette is 70 mm (20 mm of adhesive width).
- Guide width of 28 mm (20 mm glue width).
- Guide height 13.5 mm.
- The sides of the cassette extend 2 mm beyond the width of the guides.
- K - L = 4 mm
- X = 2 mm
- Guide plugs increase the height by 7 mm.

Assembly

Attention:

- The price of a roller shutter exceeding a given dimension is included in the higher range.
- Roller blinds, the width and height of which exceed the width of the fabric (A0 - 180 cm, others of the group A and C - 200 cm) have a fabric that consists of 2 parts welded together always horizontally.
- Roller shutters with a width of less than 0.5 m are counted as 0.5 m.
- Roller blinds made of fabrics with directed patterns from the group A5, A6, B3 have a standard height of 180 cm, above this height the fabric is cut from the length, which involves turning the pattern by 90 degrees.

Extra charges for roller blinds in Stella cassette

Printing on fabric (minimum conversion area of 1 m²)	73,60 €/m² of printed area
Visualization of the print	24,50 €
Painting of the cassette*	8,30 €/rm width
Painting of the weights*	2,70 €/rm width
Metal chain	5,70 €/rm height

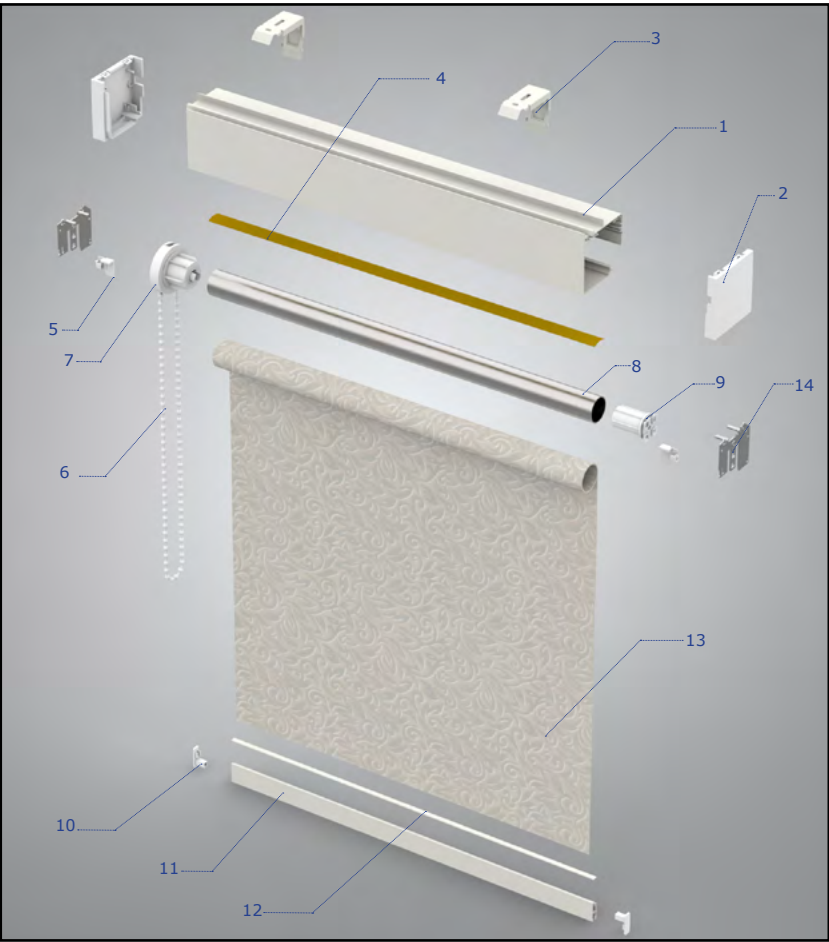

*Note: Set of colours with standard extra charge - page 161. Painting in other colours - individual pricing.
Painting elements extends lead time, PVC elements in standard colour

No possibility to produce the roller blind from Spring fabrics.

Price list of Passionata and Passionata Plus day-night roller blinds
Marina, Cedro, Paradise, Paradise Silver, Glamour, Elegance, Imagine Gold,
Jazz, Baroque, Chic, Borneo, Skyros collection

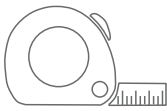

Table with Height (0.5 to 2.2) and Width (0.5 to 1.5) dimensions, listing price values for various blind models.

it is not possible to produce the blind with the following fabrics: Paradise, Paradise Silver, Timor BO
it is not possible to produce the roller blind with the following fabrics: Paradise, Paradise Silver, Timor BO, Baroque
no possibility to produce roller blind with fabrics: Paradise, Paradise Silver, Timor BO, Marina, Imagine Gold
no possibility to produce roller blind with fabrics: Paradise, Paradise Silver, Timor BO, Marina, Imagine Gold, Baroque, Skyros

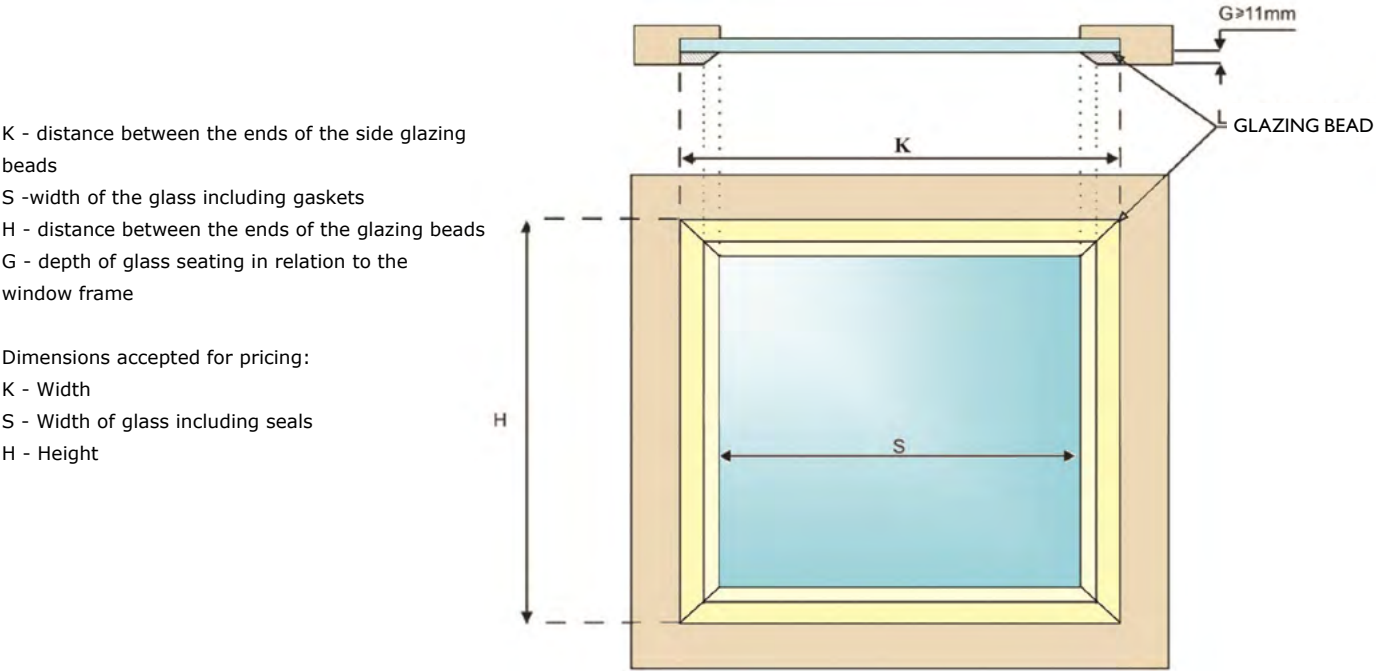

Monaco, Kea, Scandinavian Night BO collection, till the stock of Aroso lasts,
Lunica, Fiji

Table with Height (0.5 to 2.2) and Width (0.5 to 1.5) dimensions, listing price values for various blind models.

Attention:
Perfect positioning of the strips perfectly the same height for several blinds is possible only with a set of blinds in the same height and a sum of widths cannot be higher than the width of the fabric beam. It is recommended to view fabrics against the light to avoid colour illusions.
Colours of fabrics in the samples books are illustrative colours, individual batches of products may differ in shades. Colour differences in the shades of fabrics do not constitute grounds for complaint.

Measurement

Dimensions accepted for pricing:
K - Width
S - Width of glass including seals
H - Height

Notes:
G - depth of glass seating in relation to the window frame (minimum 11 mm)
If K - S shorter or equal to 44 mm - a guidance rail (30x1 mm) is used
If K - S longer than 44 mm - a guidance rail (37x1 mm) is used

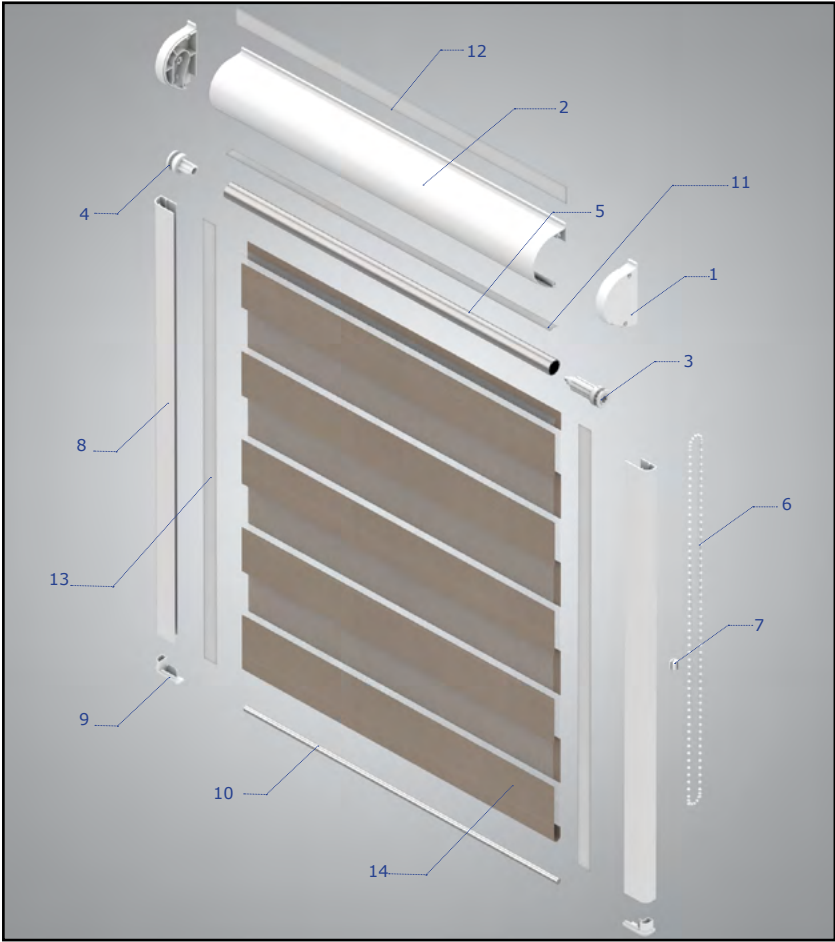

Attention:
The internal width of the "S" is not equal to the width of the fabric.
In the order, you can specify an additional dimension - the width of the material.

***Note:** Set of colours with standard extra charge - page 161. Painting in other colours - individual pricing. Painting elements extends lead time, PVC elements in standard colour

Measurement

The width and height of a roof blind mounted "inside the frame" is, by analogy with the measurement of blinds in cassettes, the distance between the edges of the window frame.

* Note: Colour set with standard extra charge - page 161.
Painting in other colours - individual pricing.
Painting elements extends lead time, PVC elements in standard colour
** Note: Please specify the width and free space height in your order.

Measurement

Hinged fly screen - dimensioning

Dimensioning a hinged fly screen is to specify the width and height of the product after its outer contour. When ordering, it is necessary to specify the side of operation (a right-hand fly screen is one in which the hinges are visible on the right side of the leaf). The strut profile is installed at half height - unless a different height is specified in the order.

NOTE

The hinges require 20 mm free space when mounted on the window frame, and 30 mm when mounted to the supporting element . The magnet requires 15 mm free space to the supporting element this should be taken into account when measuring.

Sliding fly screen - dimensioning

- To order, please specify:
- Hole width
- Hole height
- Width of the fly screen sash
-

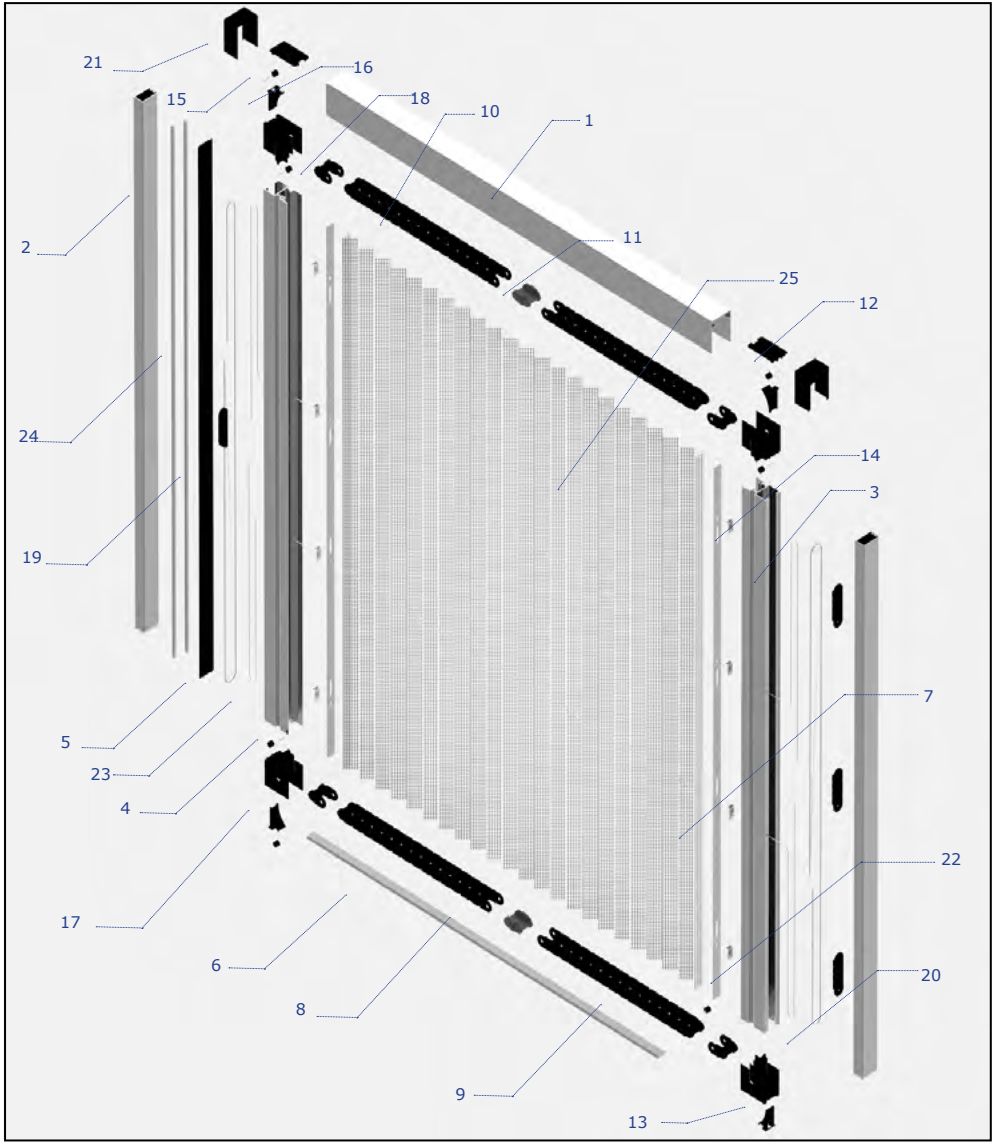

The width of the sash should not be more than half the width of the hole.
As a standard, the strut profile is mounted at half the height of the fly screen sash.

Assembly

PLISSE 20 mm Fly Screen for door

VERTEX S.A. PRODUCT WARRANTY TERMS AND CONDITIONS

1. The Company styled: VERTEX S.A. with its registered office in Czechowice-Dziedzice, 43-502, at ul. Elizy Orzeszkowej 26, entered in the Business Register of the National Court Register under KRS number: 0000288773, whose registration files are kept by the District Court for Katowice-Wschód in Katowice, 8th Commercial Division of the National Court Register, hereinafter referred to as the "Guarantor" or "Manufacturer", guarantees the good quality and efficient operation of the new product in accordance with the standards provided for the type of product, subject to the intended use, under normal conditions.

2. The warranty shall be granted by the Guarantor on the terms and conditions set forth herein.

3. The warranty shall only be granted to Buyers who have timely paid the amount due for the product received.

4. Subject to the terms and conditions specified in the warranty, this warranty shall cover defects caused by manufacturing errors, including those resulting from the use of defective materials. No other types of product defects are covered by the warranty and are hereby excluded.

5. When picking up the product at the Guarantor's registered office or on the date of delivery of the product, the Buyer is obliged to check the product packaging for damage (if any) and completeness in accordance with the order, or otherwise the right to dispute the quality and completeness of delivery shall be forfeited.

6. The Guarantor provides a warranty for a period of 24 months from the date of sale, except for engines, for which the Guarantor provides warranty for a period of 60 months from the date of sale.

7. Upon discovery of a defect, the Buyer shall be obliged to inform the Guarantor within 14 days from the date of the same being discovered. Visible defects must be complained about within 7 days from the date of purchase, but no later than before the product is installed. Failure to meet the above conditions will result in the warranty rights being forfeited.

8. Exercise of the warranty rights, i.e. acceptance of the complaint and, if applicable, subsequent warranty service benefits shall be contingent upon:

1) presentation to the Guarantor of proof of purchase (receipt or VAT invoice) with the date of sale of the complained product.

2) presentation to the Guarantor of the original warranty card containing the data specified in section 17 of the warranty terms and conditions; in case the warranty card has not been filled out correctly, if any corrections are made in the warranty card by unauthorized persons, the Buyer shall forfeit warranty rights,

3) detailed description of the defect,

4) verification and confirmation of the existence of a manufacturing defect in the product by the Guarantor.

9. In the event that a complaint is duly submitted by the Buyer, the Guarantor undertakes to:

1) consider the complaint within the shortest possible time not exceeding 30 working days from the physical receipt of the product for maintenance purposes.

2) remove the defects found in the product - if the complaint made is justified.

3) reduce the price or replace the product with a defect-free one if it is not possible to remove the defects found; in the event of the defective product or defective elements of the Product being replaced with new ones, the Buyer is obliged to surrender the defective Product or defective elements of the Product to the Guarantor.

10. Defects discovered during the warranty period will be removed by the Guarantor within the shortest possible time not exceeding 30 working days from the date the complaint is accepted, while free-of-charge repair or replacement of the complained product shall be preceded by an expert examination of the damage at the Guarantor's premises, on the basis of which the Guarantor decides whether the complaint is justified.

The Guarantor's liability shall not extend to cover the cost of disassembly of the defective product and the cost of transporting the product to the Manufacturer, as well as the cost of re-transporting and installing the product, which are charged entirely to the Buyer. The Manufacturer reserves the right to extend the deadline referred to in the preceding sentence, in case of the need to obtain additional expert opinion or the use of non-standard materials. The exact date for the removal of defects shall from time to time be agreed upon with the Buyer.

11. Free-of-charge repair of the complained product shall be carried out at the Guarantor's premises.

12. Disassembly and assembly of the complained product shall be the responsibility of the Buyer. This warranty shall not cover costs or expenses arising from disassembly or reassembly of the product, or protection of the place of installation with protective measures, during the period of the work related to the repair or replacement of the product.

13. In the event that a complaint is accepted, the Guarantor agrees to reimburse the Buyer for the transport service, upon presentation by the Buyer of appropriate documents, confirming the amount of the incurred transportation costs, as well as return the repaired Product to the Buyer at his own expense.

14. The Guarantor shall not be liable under the warranty in the event of:

1) application by the Buyer or third parties of modifications that were not carried out or authorized by the employees of the Manufacturer.

2) damage to the packaging or the product itself that were not reported on the date of receipt of the product.

3) mechanical damage and damage resulting from improper or negligent assembly, use or storage, excessive overloading, operation in improper conditions or improper electrical installation.

4) fortuitous events occurring after the release of the product, in particular caused by weather conditions, electromagnetic interference, electrical discharges or power surges.

5) use of non-original materials or accessories for the product,

6) failure to comply with the recommendations set forth in the price list and the Manufacturer's installation instructions,

7) defective use of the Product, contrary to the Manufacturer's instructions,

8) when defects, faults or damage to the Product result directly or indirectly from negligence, in particular resulting from failure to comply with the

requirements for regular inspection and servicing of the product, or negligence regarding the use and maintenance of the product in accordance with the instructions or directions for use,

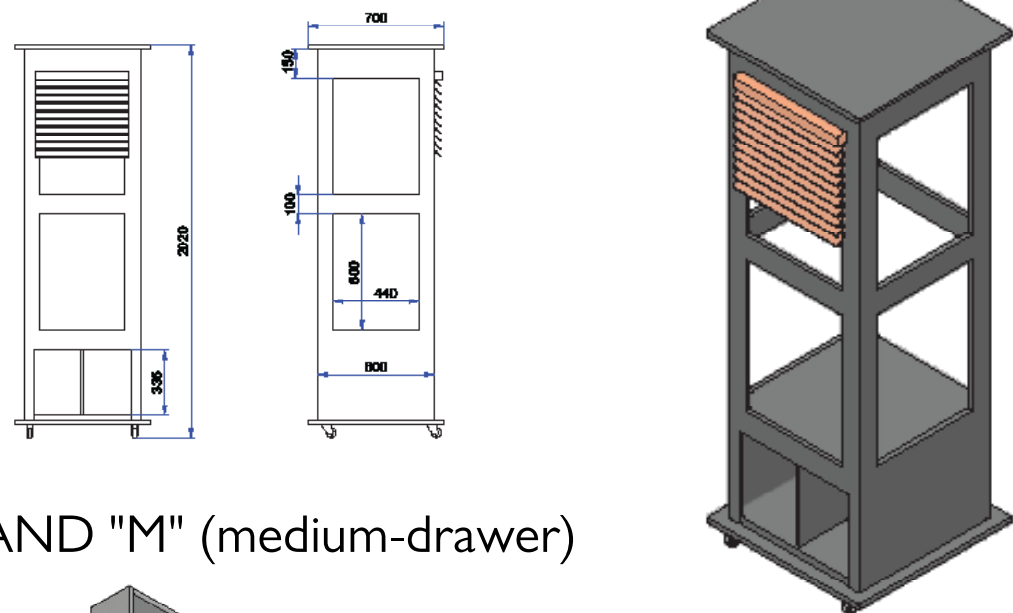

9) defects, faults or damage to the product, the occurrence of which could have been prevented by the Buyer through proper maintenance and use of the product.

15. The warranty does not cover:

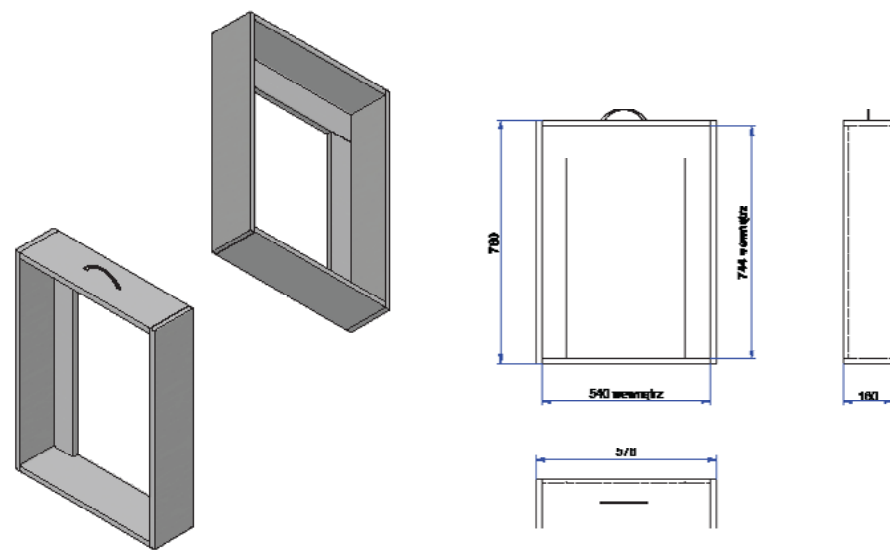

1) natural wear and tear of original components, parts and accessories caused by their normal use,

2) mechanical damage and defects caused by them,
