Horizontal blinds

We present a product overview of horizontal blinds, including their dimensions, operation, and installation methods. Our solutions can be successfully used in both residential and commercial buildings.

We offer:

Matte colors reduce light reflections, making them ideal for minimalist and calming interiors.

Glossy colors reflect light and visually brighten the room, giving it a more dynamic character.

Wood-effect colors introduce a warm, natural atmosphere to the interior.

Perforated slats provide better lighting in rooms, such as offices.

	Width of slats	Product	Page	Motor	Min. width [cm]	Max width [cm]	Max height [cm]	Max. area [m2]	Handling	Ladder type	Possibility of complete blackout (blackout ladder)	Non-invasive installation	Installation to the window	Installation to the wall

6	anthracit 7016
Dopłata	7 golden oak Renolit 2178001*
	8 walnut Renolit 2178007**
	9 mahogany Renolit 2097013***

Slats colors according to the table on page 3

tasiemki

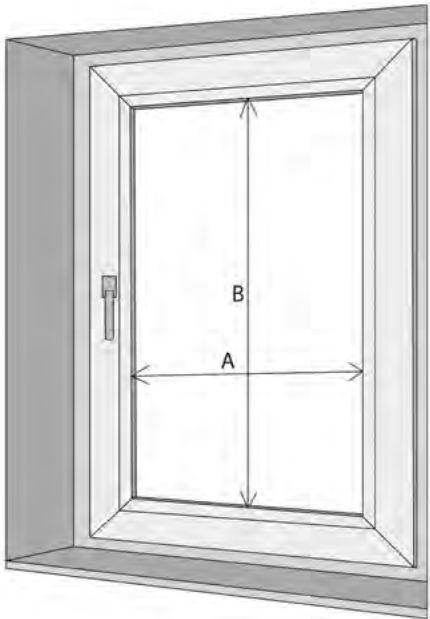

Markings in the table above:
* PVC grille similar to RAL 8004
** PVC grille similar to RAL 8014
*** PVC grille similar to RAL 8014

Attention:
The colours of slats in the patterns are illustrative colours, individual batches of products may differ in shades. Differences in the shades of the slats do not constitute grounds for complaint.

Measurement

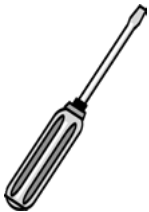

For ordering, specify the size of the glass including gaskets.

Installation at the glass consists of screwing the blinds to the glazing bead with screws. As parameters for valuation and performance we accept:

- A - Width of the glass including seals,
- B - Height of the glass including gaskets.

It is not possible to produce electrically controlled blinds.

Attention:

- The price of a product exceeding a given dimension is included in the higher range.
- The table contains only price ranges. In the selection of dimensions, please follow the technical data.
- In the case of blinds with small widths and large heights, an uneven laying effect may occur slats in a pack of slats.

Extra charges for horizontal aluminum chain blinds 25 mm, 16 mm

Side guidance - fixation blinds	4,80 €/set
Blackout blind made of 25 mm tape	+ 12% to the price list
Woodengrain tape blind 25 mm	+ 30% to the price list
25 mm perforated tape blind (white, black, silver)	+ 30% to the price list
Top and bottom rail painting in RAL colours*	6,20 €/rm width
Covers painting in RAL colours*	3,90 €/rm width
Woodengrain veneer covers	10,40 €/rm width

*Note: Set of colours with standard extra charge - page 161
Painting in other colours - individual pricing.
Painting elements extends lead time, PVC elements in standard colour

Measurement

- For the order, specify the width and height of the glass with seal - installation between the glazing beads.
- For ordering, specify the dimension after the outer contour of the product - frame mounting.

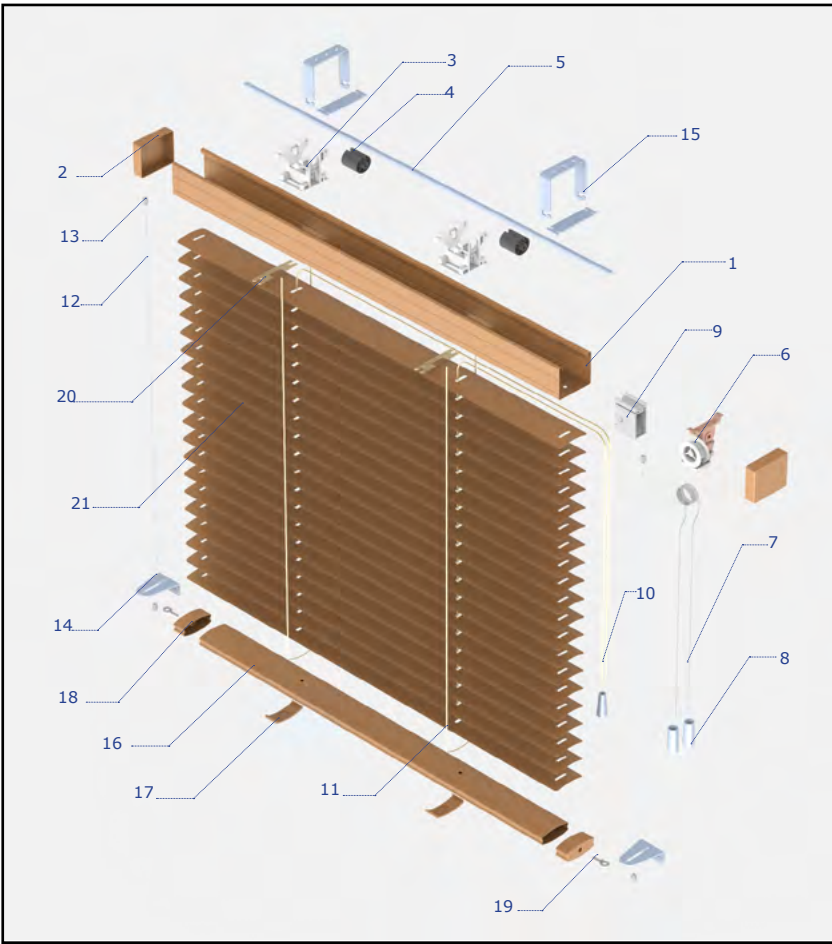

Assembly

Horizontal aluminum blinds 50 mm

- Top rail (H.58 x D.51 mm)
- Top rail plug
- Bearing
- Ladder attachment 9
- Steel rod
- Gear box
- String
- Bell
- String brake
- Cord
- Ladder
- Side guidance
- Side guidance
- Fixation angle with sleeve
- Fixing the top rail
- Bottom rail (50x19 mm)
- Bottom rail stopper
- Bottom rail plug
- Bottom rail pin
- Tape clip
- 50 mm aluminum slats

TECHNICAL INFORMATION	STRING CONTROL	MOTOR CONTROL
Minimum width	420 mm	700 cm
Maximum width	3000 mm	3000 mm
Maximum height	3000 mm	3000 mm
Maximum area	6,0 m²	9,0 m²

The resistance to pulling up the blinds increases with the surface area.

In electrically operated blinds it is possible to use a tape ladder - note that this increases the height of the package when pulled up.

SIZE OF THE SLATS PACKAGE WHEN THE BLIND IS PULLED UP						
Blinds height	500 mm	1000 mm	1500 mm	2000 mm	2500 mm	3000 mm
The height of the folded package with cord ladder	100 mm	120 mm	140 mm	160 mm	180 mm	200 mm
Height of folded package with tape ladder	100 mm	120 mm	140 mm	170 mm	200 mm	240 mm

wooden slats
sample book

Front cover with side covers at request (no extra charge).

Attention:

The colours of the slats in the patterns are reference colours, individual batches of products may differ in shades. Wood, as a natural material, can behave differently under changing conditions. The slats may deform depending on the place where the curtain is used. This situation is most common in rooms with higher humidity (bathroom, kitchen) and where there are large temperature fluctuations (conservatories). However, this is a natural process. Due to the nature of wooden blinds, differences in the shades of the slats, minor chipping of the varnish and minor deformations are acceptable. These do not constitute grounds for complaint.

Attention:
The colours of the slats in the patterns are illustrative colours, and individual batches of products may differ in shades. Wood, as a natural material, can behave differently under changing conditions. The slats may deform depending on where the curtain is used. This situation is most common in rooms with higher humidity (bathroom, kitchen) and where there are large temperature fluctuations (conservatories). However, this is a natural process. Due to the nature of wooden blinds, differences in the shades of the slats, minor chipping of the varnish and minor deformations are acceptable. These do not constitute grounds for complaint.

wooden slats sample book

Price list of horizontal wooden chain blinds 25 mm

- Note:**
- The price of a product exceeding a given dimension is included in the higher range.
 - The table only lists price ranges. When selecting dimensions, please refer to the technical data.
 - For blinds with narrow widths and large heights, uneven arrangement of the blades within the bundle may occur.

- The price of a product exceeding a given dimension is included in the higher range.
- The price does not include guides, which are charged separately. They can only be used with the AB22 model.
- The table only lists price ranges. When selecting dimensions, please refer to the technical data.

We recommend verifying the technical and dimensional limitations of individual fabrics.

- The price of a product exceeding a given dimension is included in the higher range.
- The price does not include guides, which are charged separately. They can only be used with the AB22 model.
- The table only lists price ranges. When selecting dimensions, please refer to the technical data.

We recommend verifying the technical and dimensional limitations of individual fabrics.

Maximum height	3000 mm

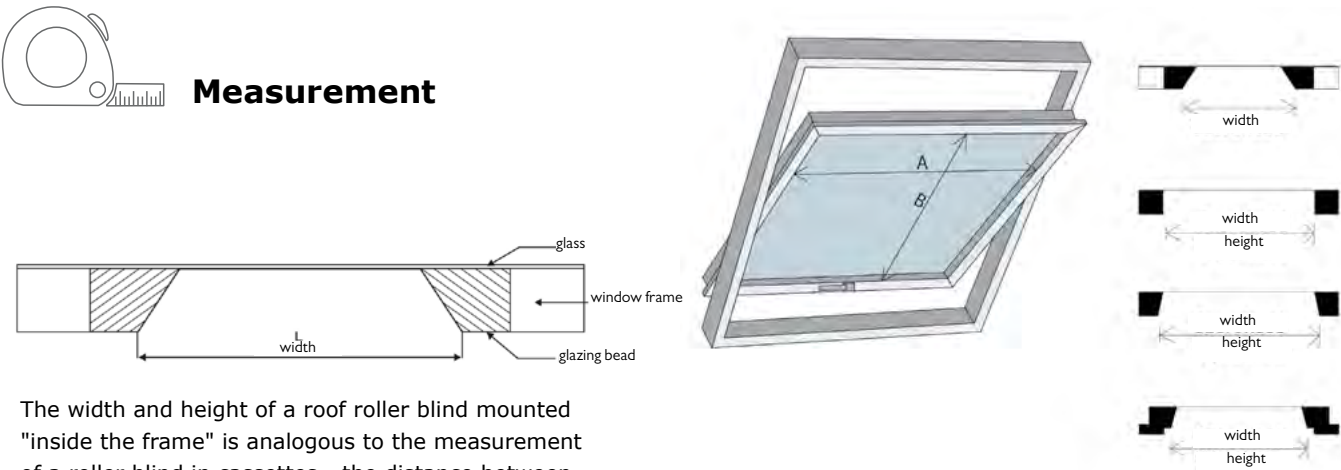

* Depends on the width of the fabric

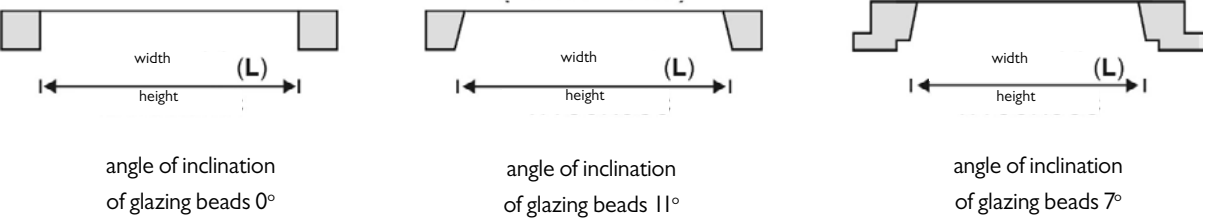

ROOF PLEATED BLINDS

Roof pleated blinds are a modern and highly attractive window covering solution. Their use makes them ideal for attics, where the product requires angled installation. Additional side guides are used to maintain the stability of the pleated blind on the roof window.

For added attractiveness, honeycomb fabrics, also known as duo fabrics, can be used, which lack visible stitching and cords, with the entire fabric neatly concealed within. This solution makes roof pleated blinds ideal for spaces with high sun exposure.

The width and height of a roof roller blind mounted "inside the frame" is analogous to the measurement of a roller blind in cassettes - the distance between the edges of the window frame.

NOTE: The L dimension is used for pricing. When ordering, please provide this dimension and the window type. For non-standard windows, please provide the angle of the glazing beads.

Roller blinds

We present a list of internal blinds, including their type, dimensions, method of operation and type of installation.

- Free-hanging roller blinds** (Presto, Triola, Triola 2, Largo, Moderato)
- They are quick to install and can cover large windows and shop windows. They are particularly recommended for commercial buildings (offices, schools, kindergartens, government offices, conference rooms), as well as for individual buildings where the use of cassette roller blinds is not possible.

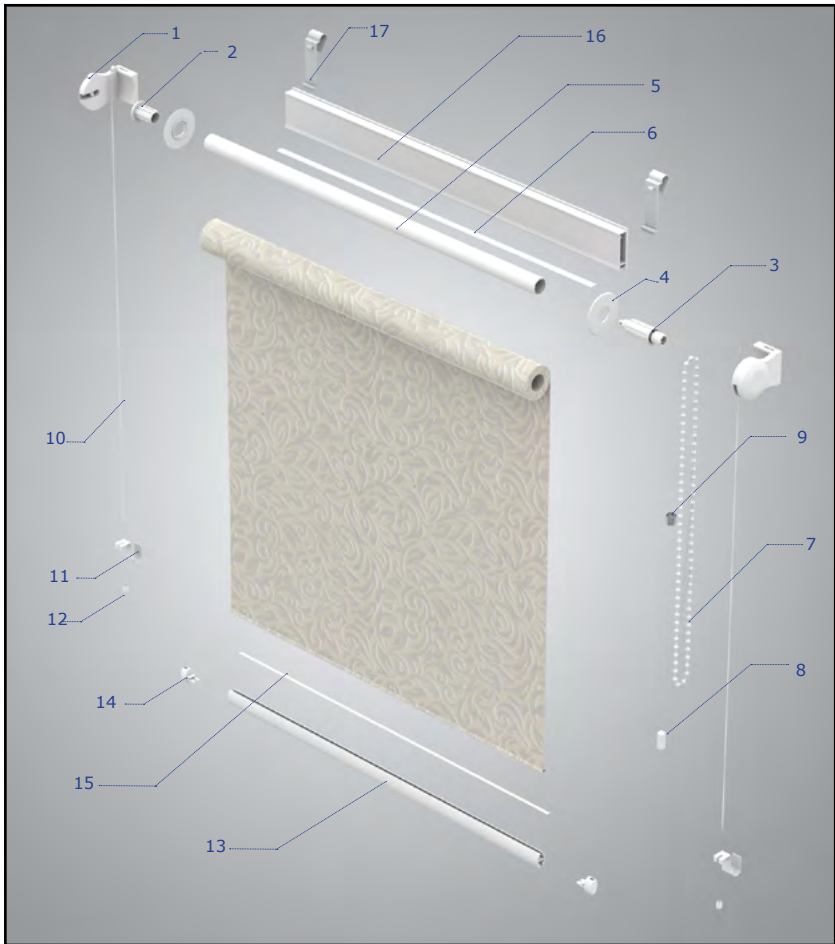

- Cassette roller blinds**
- They provide a higher level of aesthetics and durability. When used with guides, they guarantee better shading and keep the fabric close to the glass.
 - An ideal solution for windows that are frequently tilted.
 - Recommended for both residential and commercial buildings, where investors expect high aesthetics, functionality, and effective shading.

Side guidance - fixation		yes	yes	yes
Colours of PVC elements and steel hangers		white		
		grey		
		anthracite		
		black		

- Attention:**
- As standard, the roller shutter is equipped with a manual - chain drive. Electric drive with selected control system available at an extra charge.
 - In roller blinds with large areas, it is necessary to join the fabric with a weld (always horizontally), which is not always feasible in the case of patterned fabrics.
 - It is recommended look at the fabrics against the light to avoid colour illusions. The colours of fabrics in the samples books are illustrative colours, individual batches of products may differ in shades. Colour differences in the shades of fabrics do not constitute grounds for complaint.

4,0	400	470	539	608	677	747	816	885								

-  **Note:**
- The total dimension is used for pricing.
 - The price of a blind exceeding a given dimension is included in the higher range.
 - Blinds whose width and height exceed the width of the fabric (A0 - 180 cm, other blinds from groups A and C - 200 cm) have fabric composed of two parts welded together horizontally.
 - Blinds made of fabrics with directional patterns from groups A5, A6, and B3 have a maximum height of 180 cm. Above this height, the fabric is cut lengthwise, which involves rotating the pattern 90 degrees.
 - The table only contains price ranges. When selecting dimensions, please refer to the technical data.
 - The blind fabric is narrower than the total dimension by a factor depending on the blind type – see the "Technical Information" table on page 65.

We recommend verifying the technical and dimensional limitations of individual fabrics.

- We recommend using PASSIONATA and PASSIONATA PLUS roller blinds on smooth PVC windows. If the roller blind is used with PVC veneers with a "thick" wood-effect veneer or on wooden windows, we are not responsible for any detachment of the profiles from the window.
- It is recommended to view the fabrics against the light to avoid color illusions. Fabric colors in the sample books are for illustrative purposes only; individual product batches may vary in shade. Color differences in fabric shades do not constitute grounds for complaint.

Passionata

The discreet design of the gently rounded cassette gives the window a modern look. In the "Plus" model, the cassette side conceals the mounting screws. Thanks to the exquisite precision of the components, the roller blind fits perfectly into the window frame, becoming an aesthetically pleasing, integral element.

We recommend verifying the technical and dimensional limitations of individual fabrics.

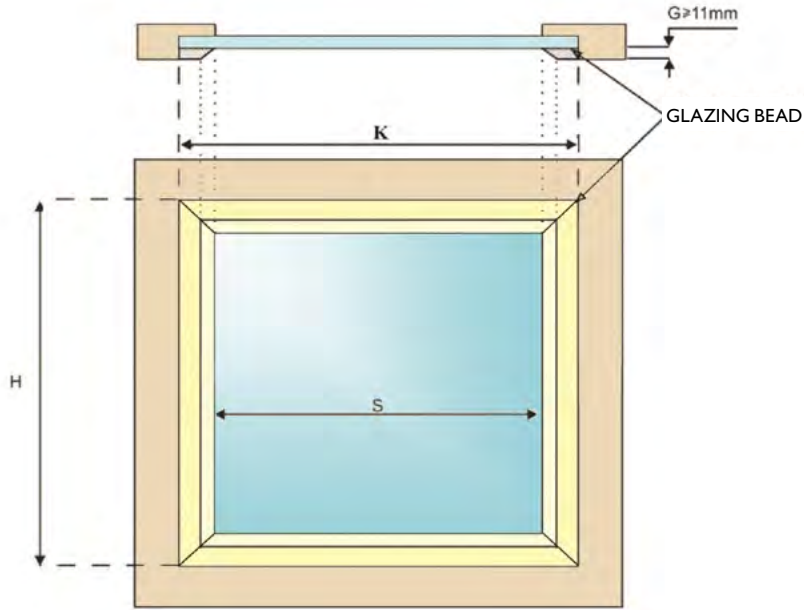

Note:

- The price of a roller blind exceeding a given dimension is included in the higher range.
- Roller blinds with a width of less than 0.5 m are calculated as 0.5 m.
- We recommend using cassette roller blinds with fabrics from groups A and C. Using fabrics from group B is possible, however, there is a risk of the rubberized fabric layer sticking to the glass, which will damage the fabric.
- Roller blinds made from fabrics with directional patterns from groups A5, A6, and B3 have a standard height of 180 cm. Above this height, the fabric is cut lengthwise, which involves rotating the pattern 90°.
-
- The weight is normally cut at a 90° angle. If the glazing bead is decorative or at a significant angle, the weight can be cut at a 45° angle in Passionata roller blinds (weight caps are not available). Please specify this when ordering.

Measurement

- K – distance between the ends of the side glazing beads
- S – width of the glass including seals
- H – roller blind height – distance between the ends of the glazing beads
- G – depth

Dimensions used for pricing:

- K - width*
- S - width of the glass pane including seals
- H - distance between the ends of the glazing beads
- G - depth of the glass pane in relation to the window frame (minimum 11 mm)

* If $K - S \leq 40$ mm, a guide (30x1 mm) is used.

* If $K - S \leq 54$ mm, a guide (37x1 mm) is used.

Note:

The internal width "S" is not equal to the fabric width; it is normally calculated using the formula: $TK = S - 4$ mm.

You can specify an additional dimension in your order – the fabric width (TK), with the following restrictions:

1. 30mm guides - $K - TK \leq 44$ mm
2. 37mm guides - $K - TK \leq 58$ mm

- **Note:**
- The price list applies to complete blinds with guides and manual drive, with fabric from the A0, A1, or A2 group.
 - Any blind exceeding a given dimension is priced in the higher range.
 - Blinds less than 0.5 m wide are calculated as 0.5 m.
 - Blinds made from fabrics with directional patterns from the A5, A6, or B3 groups have a maximum height of 180 cm. Above this height, the fabric is cut lengthwise, which involves rotating the pattern 90 degrees.

We recommend verifying the technical and dimensional limitations of individual fabrics.

Extra charges for blinds in Suita cassette

Fabric print (minimum conversion area 1 m²)	75,80 €/m² of printed area
Print visualization	25,30 €
Mini chain weight (white and brown)	0,50 €/pc
Universal chain weight (white, beige, brown, anthracite)	0,50 €/pc
Chain tensioner (white and brown)	1,00 €/pc
Suita - non-invasive hangers 3-compartment = 14 mm, 4-compartment = 19 mm, 5-compartment = 24 mm (white)	1,80 €/set
Suita - non-invasive hangers 3-compartment = 14 mm, 4-compartment = 19 mm, 5-compartment = 24 mm (blackened)	1,40 €/set
Suita - additional charge for wood-effect color	25,10 € rm/total width
Painting of aluminum elements (cassette, weight) in any RAL color*	10,40 €/rm width
Painting of aluminum elements (guides) in any RAL color*	6,00 €/rm height

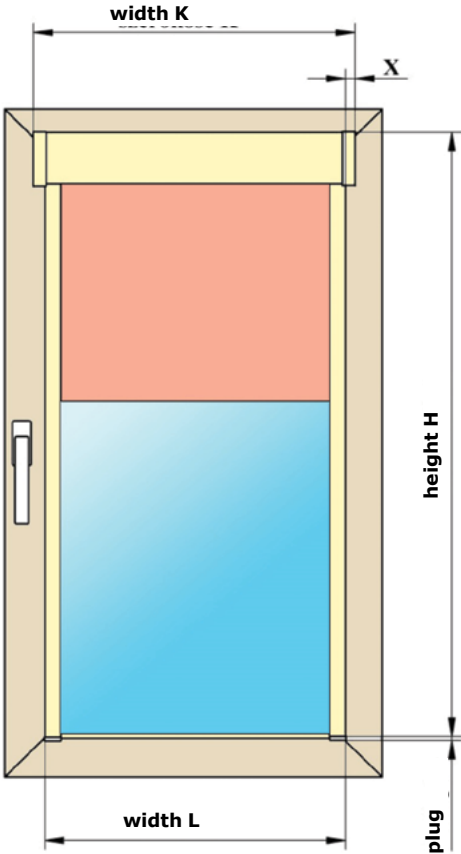

- Note: Painting the elements extends the lead time. PVC elements are available in standard colors.**
- *Color set with standard surcharge - page 161. Painting in other colors - individual pricing.**
- We do not use non-invasive hangers with RENOLIT veneer cassettes.**

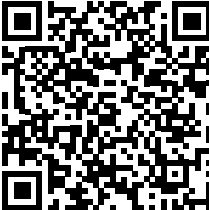

Measurement

Fabric roller blinds with chamber guides are mounted on the window sash frame. A flat adhesive surface (20mm) is required for the cassette and each guide.

- Dimensions accepted for pricing:
-
- L - width
- H - height
- **Note:**
- Cassette height: 70 mm (20 mm gluing width).
- Guide width: 28 mm (20 mm gluing width).
- Guide height: 13.5 mm.
- Cassette sides extend 2 mm beyond the guide width.
- K - L = 4 mm
- X = 2 mm
- Guide end caps increase the height by 7 mm.

Assembly

Note:

- The price of a blind exceeding a given dimension is included in the higher range.
- Blinds whose width and height exceed the width of the fabric (A0 - 180 cm, other blinds from groups A and C - 200 cm) have fabric composed of two parts welded together horizontally.
- Blinds less than 0.5 m wide are counted as 0.5 m.
- Blinds made of fabrics with directional patterns from groups A5, A6, and B3 have a standard height of 180 cm. Above this height, the fabric is cut lengthwise, which involves rotating the pattern 90 degrees.

Extra charges for roller blinds in Stella cassette

Printing on fabric (minimum conversion area of 1 m²)	75,80 €/m² of printed area
Visualization of the print	25,30 €
Painting of the cassette*	8,60 €/rm width
Painting of the weights*	2,80 €/rm width
Metal chain	5,90 €/rm width

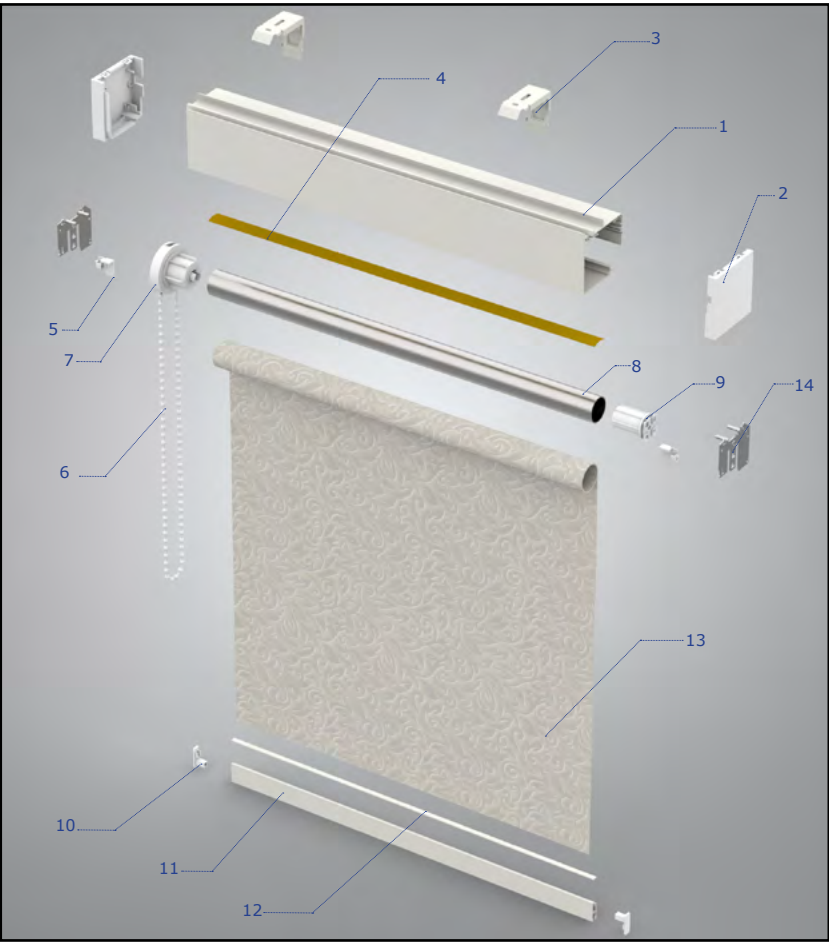

***Note:** Standard color set available at an additional cost - see page 161. Painting in other colors - individual pricing. Painting elements extends the lead time; PVC elements are in standard colors.

Note:
Setting the stripes to the exact same height for multiple blinds is only possible with a set of blinds of the same height and with a total width no greater than the width of the fabric roll. It is recommended to view the fabrics against the light to avoid color illusions. Fabric colors in the sample books are for illustrative purposes only; individual product batches may vary in shade. Color differences in fabric shades do not constitute grounds for complaint.

Non-invasive hanger 3-chamber = 14 mm, 4-chamber = 19 mm, 5-chamber = 24 mm (white, brown, light brown)	3,80 €/set

Measurement

For ordering, please specify the width and height after the outer contour of the product.

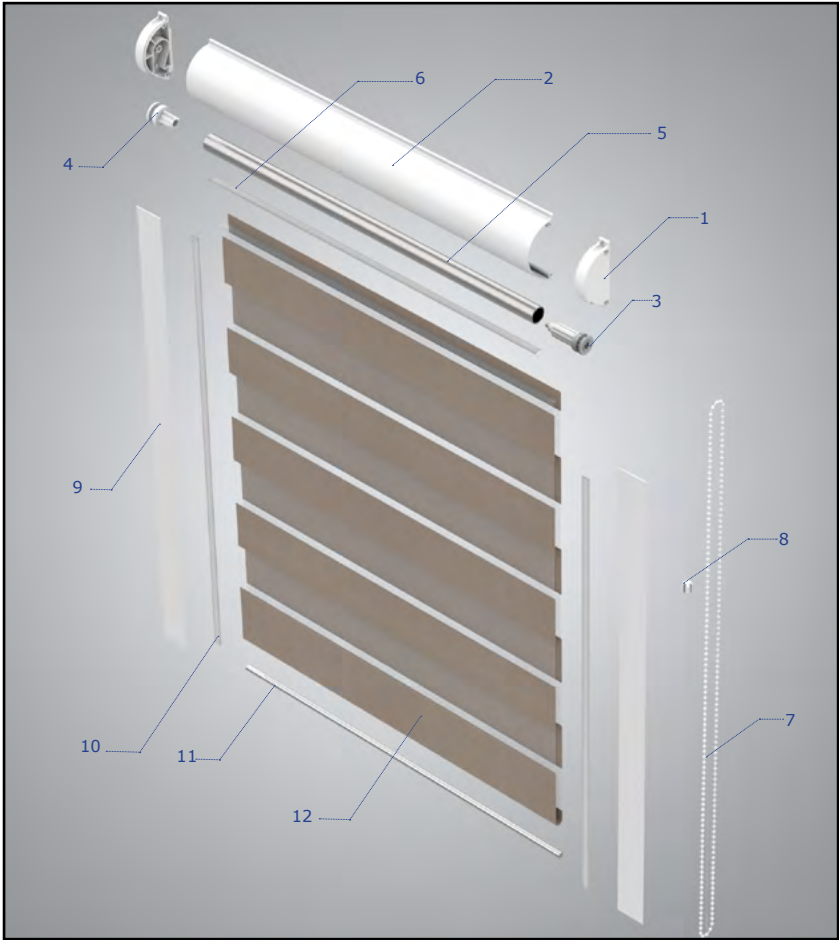

Assembly

- Day/Night blinds have a fabric setting in the "closed = night" position when the blind is extended to its full height.
- Aligning the strips in multiple Day/Night blinds is only possible if the blinds are the same height, use the same fabric, and the total width of the blinds cannot exceed the width of the fabric roll.
- Any blinds exceeding a given dimension are priced in the higher range.

Passionata and Passionata Plus Day-Night Roller Shutter

- 1. Side of the cassette
- 2. Cassette (H.65 x D.32 mm)
- 3. MS-01 self-locking mechanism
- 4. Supportin roll
- 5. Ø15 mm tube
- 6. Double-sided adhesive tape
- 7. Operating chain
- 8. Chain connector
- 9. Guide V (30x1 mm)
- 10. Foam tape
- 11. Ø8 mm fabric weights
- 12. Fabric D/N

2,2	101	117	134	150	167	183	200	217	234	251	267

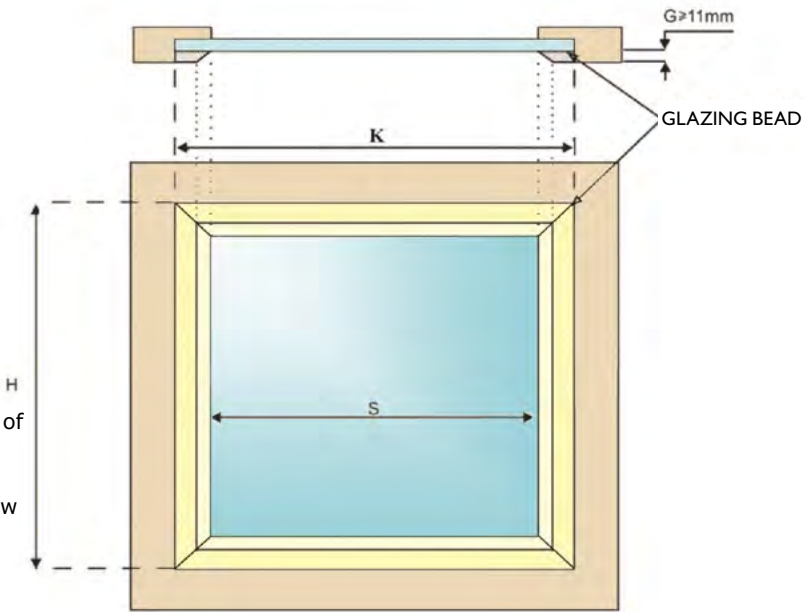

We recommend verifying the technical and dimensional limitations of individual fabrics.

 **Note:**
Setting the stripes to the exact same height for multiple blinds is only possible with a set of blinds of the same height and with a total width no greater than the width of the fabric roll. It is recommended to view the fabrics against the light to avoid color illusions.
The fabric colors in the sample books are for illustrative purposes only; individual product batches may vary in shade. Color differences in fabric shades do not constitute grounds for complaint.

Measurement

- K – distance between the ends of the side glazing beads
- S – width of the glass pane with seals
- H – roller blind height – distance between the ends of the glazing beads
- G – depth of the glass pane in relation to the window frame

Dimensions used for pricing:

- K - width*
- S - width of the glass pane including seals
- H - distance between the ends of the glazing beads
- G - depth of the glass pane in relation to the window frame (minimum 11 mm)
- * If $K - S \leq 40$ mm – a guide (30x1 mm) is used
- * If $K - S \leq 54$ mm – a guide (37x1 mm) is used

Note:

The internal width "S" is not equal to the fabric width; it is normally calculated using the formula: $TK = S - 4mm$.

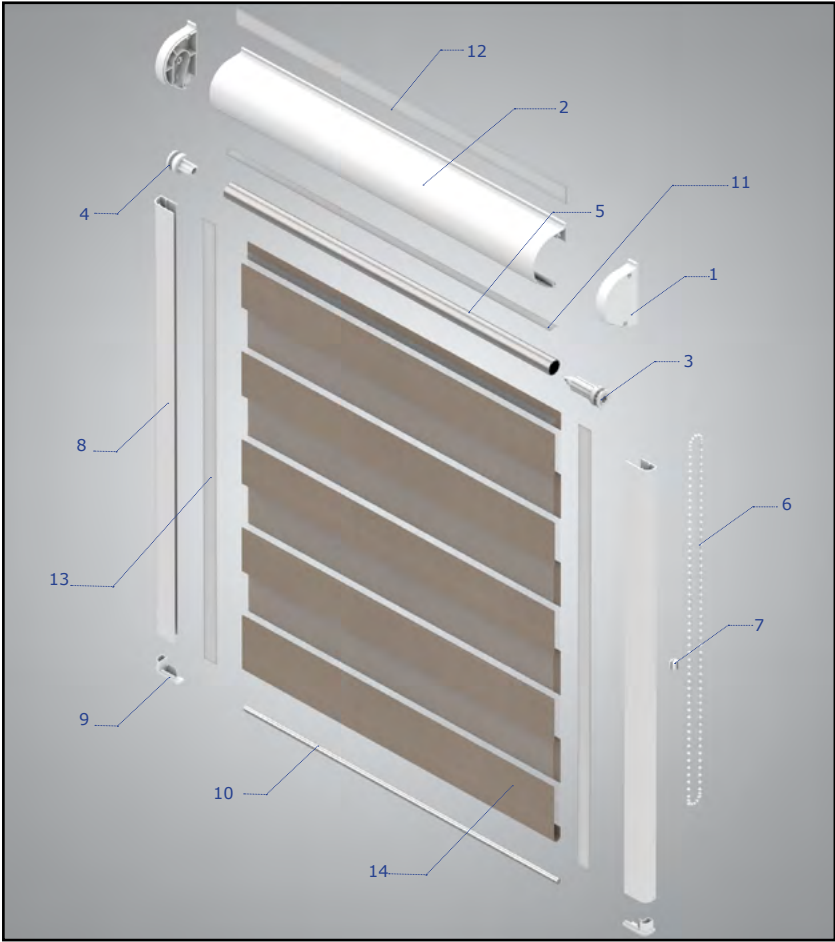

- You can specify an additional dimension in your order – the fabric width (TK), with the following restrictions:
1. 30mm guides - $K - TK \leq 44mm$
 2. 37mm guides - $K - TK \leq 58mm$

* while supplies last

We recommend verifying the technical and dimensional limitations of individual fabrics.

Note:

- Day/Night blinds have a fabric setting in the "closed = night" mode with the blind extended to its full height.
- Aligning the stripes in multiple Day/Night blinds is only possible if the blinds are the same height, the same material, and the total width of the blinds cannot exceed the width of the fabric beam.
- It is recommended to view the fabrics against the light to avoid color illusions. Fabric colors in the sample books are illustrative; individual product batches may vary in shade. Color differences in fabric shades do not constitute grounds for complaint.
- The price of a blind exceeding a given size is included in the higher range.

Extra charges for blinds Day Night Suite

Type	Price
Mini chain weight (white and brown)	0,50 €/pc
Universal chain weight (white, beige, brown, anthracite)	0,50 €/pc
Chain tensioner (white and brown) - an alternative to the chain hook	1,00 €/pc
Suita - additional charge for wood-effect color (see technical information on p. 97)	25,00 €/rm width
Aluminum elements (cassette, weight) can be painted in any RAL color*	8,30 €/rm width
Aluminum elements (guides) can be painted in any RAL color*	6,00 €/rm height
Suita - Non-invasive hangers 3-chamber = 14 mm, 4-chamber = 19 mm, 5-chamber = 24 mm (white)	1,80 €/set
Suita - Non-invasive hangers 3-chamber = 14 mm, 4-chamber = 19 mm, 5-chamber = 24 mm (blackened)	1,40 €/set

***Note:** Standard color set available at an additional cost - see page 161. Painting in other colors - individual pricing.
Painting elements extends the lead time; PVC elements are in the standard color.
We do not use non-invasive hangers with RENOLIT veneer cassettes.

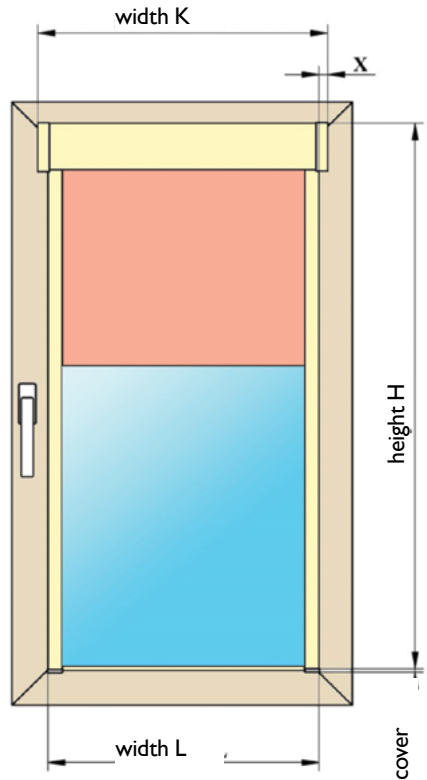

Measurement

Fabric roller blinds with chamber guides are mounted on the window sash frame.

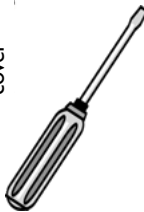

- Dimensions accepted for pricing:
- L - width
- H - height

Note:

- Cassette height: 70 mm (20 mm gluing width)
- Guide width: 28 mm (20 mm gluing width)
- Guide height: 13.5 mm
- Cassette sides extend 2 mm beyond the guide width
- K - L = 4 mm
- X = 2 mm
- Guide caps increase the height by 7 mm

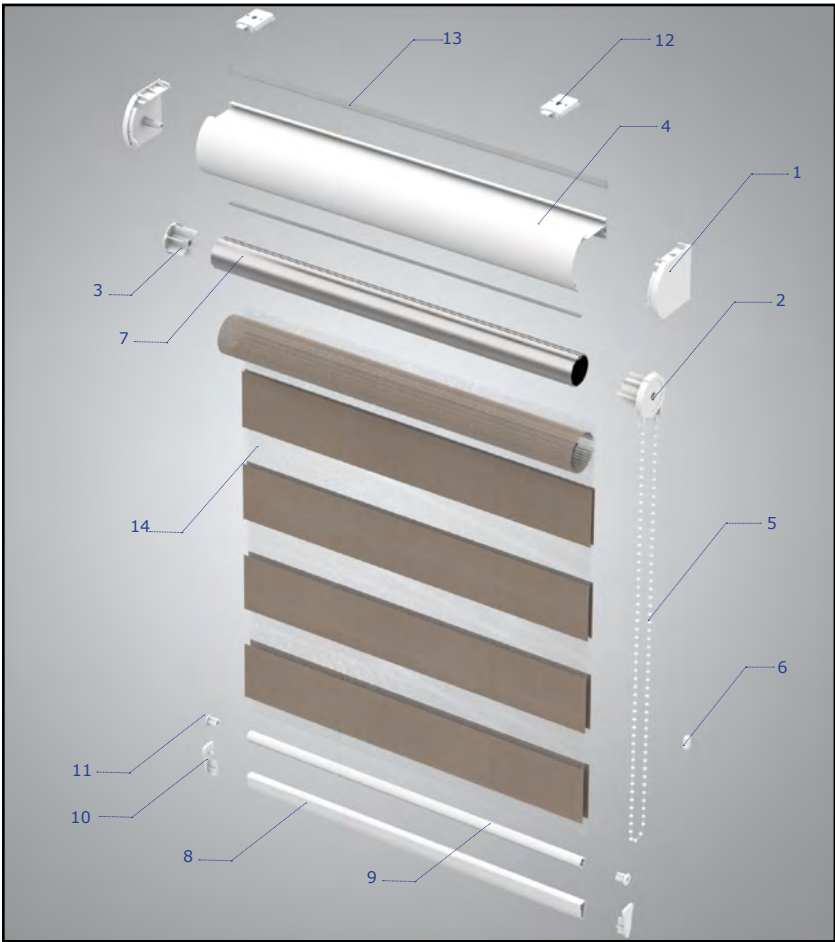

Assembly

ELIZA day-night roller blind

- 1. Side of the cassette
- 2. Mechanism
- 3. Supporting roll
- 4. Cassette (H.74 x D.67 mm)
- 5. Operating chain
- 6. Chain connector
- 7. Ø38 mm tube
- 8. Duoflor weights
- 9. Duoflor weights
- 10. Weights cap
- 11. Round weights stopper
- 12. Double-sided hanger
- 13. Adhesive tape
- 14. Fabric D/N

TECHNICAL INFORMATION		BEAD CHAIN
Minimum width		300 mm
Minimum width		2400 mm
Material narrower than the width of the blind "L" 3 cm		
Maximum height		2500 mm
Colours of cassette, sides, weights (RAL)	white	RAL 9016
	brown	RAL 8019
	silver - anodized	RAL 9006

We recommend verifying the technical and dimensional limitations of individual fabrics.

Extra charges for Eliza Day Night blinds

Duoflor weights painting in RAL* colour	4,00 €/rm width
Painting of Bellisima weights in RAL* colour	6,00 €/rm width
Painting the cassette*	10,40 €/rm width
Metal chain	5,90 €/rm height

***Note:** Standard color set available at an additional cost - see page 161. Painting in other colors - individual pricing.
Painting elements extends the lead time; PVC elements are in standard colors.

- Day/Night blinds are set to the "closed = night" setting with the blind extended to its full height.
- Aligning the stripes in multiple Day/Night blinds is only possible if the blinds are the same height, the same material, and the total width of the blinds cannot exceed the width of the fabric roll.
- It is recommended to view the fabrics against the light to avoid color illusions. The fabric colors in the sample books are for illustrative purposes only; individual product batches may vary in shade. Color differences in fabric shades do not constitute grounds for complaint.
- The price of a blind exceeding a given dimension is included in the higher range.
- Blinds with a width of less than 0.5 m are calculated as 0.5 m.

Measurement

For ordering, please specify the width and height after the total contour of the product.

- Roller blinds less than 0.5 m wide are counted as 0.5 m.
- Roller blinds exceeding this width are priced in the higher range.

We recommend verifying the technical and dimensional limitations of individual fabrics.

Extra charges for Stella Day Night blinds

Duoflor weights painting in RAL* colour	4,00 €/rm
Painting the weights fi12 in RAL* colour	4,00 €/rm
Painting the cassette*	4,00 €/rm
Metal chain	4,00 €/rm height

* Standard color set with additional charge - page 161. Painting in other colors - individual pricing.

Note:

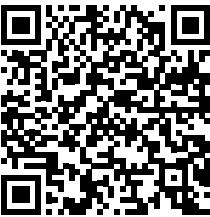

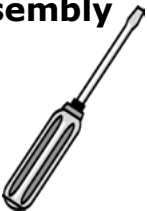

Day/Night blinds have a fabric setting of "closed = night" with the blind extended to its full height. Aligning the strips in multiple Day/Night blinds is only possible if the blinds are the same height, the same fabric, and the sum of the blind widths cannot exceed the width of the fabric roll.

Measurement

When ordering, please provide the width and height of the product's outer contour.

Extra charges for Vivo roof blinds

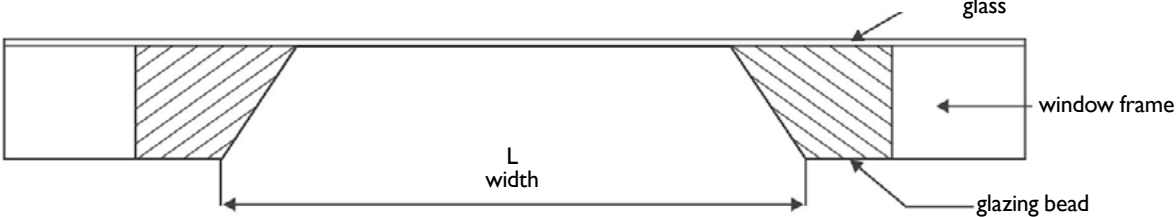

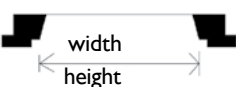

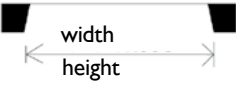

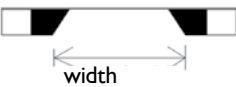

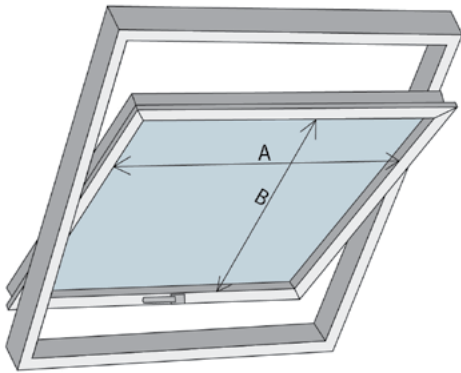

Type	Price
VIVO in veneers (golden oak, walnut, light oak)	+ 35% to the price list
Profiles (cover, weight) painted in a RAL color*	6,60 €/rm width
Profiles (guides) painted in a RAL color*	8,60 €/rm height
1.5 m extension for operation	13,80 €/pc
"Print on fabric (minimum print area is 1 m². Print only on white fabric - A2 and B2)"	75,80 €/m² of printed area

***Note:** Standard color set available at an additional cost - see page 161. Painting in other colors - individual pricing. Painting elements extends the lead time; PVC elements are in standard colors.

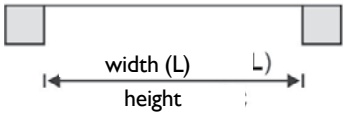

Measurement

The width and height of a roof roller blind mounted "inside the frame" is analogous to the measurement of a roller blind in cassettes - the distance between the edges of the window frame.

ROTO
(without bevels)

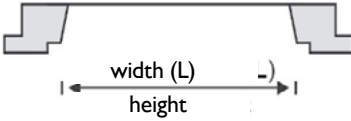

angle of inclination of glazing
beads 0°

FAKRO

angle of inclination of glazing
beads 11°

VELUX
(with bevels)

angle of inclination of glazing
beads 7°

VIVO Custom
Roof Roller
Blinds

Sizing
using a ruler

NOTE: The L dimension is used for pricing. When ordering, please provide this dimension and the window type. For non-standard windows, please provide the angle of the glazing beads.

The VS motor is designed for use in a 42 mm diameter pipe. It is not technically possible to install this motor in a 30 mm diameter pipe—its diameter and design parameters are designed exclusively for a larger system. For 30 mm pipe, we use Cullis motors, which have a smaller diameter and are specifically designed for this solution.

According to the technical requirements of the Qualicoat 2024 quality mark, the quality of powder-coated surfaces is assessed from a distance of 3 meters.

VERTEX S.A. PRODUCT WARRANTY TERMS AND CONDITIONS

1. The Company styled: VERTEX S.A. with its registered office in Czechowice-Dziedzice, 43-502, at ul. Elizy Orzeszkowej 26, entered in the Business Register of the National Court Register under KRS number: 0000288773, whose registration files are kept by the District Court for Katowice-Wschód in Katowice, 8th Commercial Division of the National Court Register, hereinafter referred to as the "Guarantor" or "Manufacturer", guarantees the good quality and efficient operation of the new product in accordance with the standards provided for the type of product, subject to the intended use, under normal conditions.
2. The warranty shall be granted by the Guarantor on the terms and conditions set forth herein.
3. The warranty shall only be granted to Buyers who have timely paid the amount due for the product received.
4. Subject to the terms and conditions specified in the warranty, this warranty shall cover defects caused by manufacturing errors, including those resulting from the use of defective materials. No other types of product defects are covered by the warranty and are hereby excluded.
5. When picking up the product at the Guarantor's registered office or on the date of delivery of the product, the Buyer is obliged to check the product packaging for damage (if any) and completeness in accordance with the order, or otherwise the right to dispute the quality and completeness of delivery shall be forfeited.
6. The Guarantor provides a warranty for a period of 24 months from the date of sale, except for engines, for which the Guarantor provides warranty for a period of 60 months from the date of sale.
7. Upon discovery of a defect, the Buyer shall be obliged to inform the Guarantor within 14 days from the date of the same being discovered. Visible defects must be complained about within 7 days from the date of purchase, but no later than before the product is installed. Failure to meet the above conditions will result in the warranty rights being forfeited.
8. Exercise of the warranty rights, i.e. acceptance of the complaint and, if applicable, subsequent warranty service benefits shall be contingent upon:
 - 1) presentation to the Guarantor of proof of purchase (receipt or VAT invoice) with the date of sale of the complained product.
 - 2) presentation to the Guarantor of the original warranty card containing the data specified in section 17 of the warranty terms and conditions; in case the warranty card has not been filled out correctly, if any corrections are made in the warranty card by unauthorized persons, the Buyer shall forfeit warranty rights,
 - 3) detailed description of the defect,
 - 4) verification and confirmation of the existence of a manufacturing defect in the product by the Guarantor.
9. In the event that a complaint is duly submitted by the Buyer, the Guarantor undertakes to:
 - 1) consider the complaint within the shortest possible time not exceeding 30 working days from the physical receipt of the product for maintenance purposes.
 - 2) remove the defects found in the product - if the complaint made is justified.
 - 3) reduce the price or replace the product with a defect-free one if it is not possible to remove the defects found; in the event of the defective product or defective elements of the Product being replaced with new ones, the Buyer is obliged to surrender the defective Product or defective elements of the Product to the Guarantor.
10. Defects discovered during the warranty period will be removed by the Guarantor within the shortest possible time not exceeding 30 working days from the date the complaint is accepted, while free-of-charge repair or replacement of the complained product shall be preceded by an expert examination of the damage at the Guarantor's premises, on the basis of which the Guarantor decides whether the complaint is justified. The Guarantor's liability shall not extend to cover the cost of disassembly of the defective product and the cost of transporting the product to the Manufacturer, as well as the cost of re-transporting and installing the product, which are charged entirely to the Buyer. The Manufacturer reserves the right to extend the deadline referred to in the preceding sentence, in case of the need to obtain additional expert opinion or the use of non-standard materials. The exact date for the removal of defects shall from time to time be agreed upon with the Buyer.
11. Free-of-charge repair of the complained product shall be carried out at the Guarantor's premises.
12. Disassembly and assembly of the complained product shall be the responsibility of the Buyer. This warranty shall not cover costs or expenses arising from disassembly or reassembly of the product, or protection of the place of installation with protective measures, during the period of the work related to the repair or replacement of the product.
13. In the event that a complaint is accepted, the Guarantor agrees to reimburse the Buyer for the transport service, upon presentation by the Buyer of appropriate documents, confirming the amount of the incurred transportation costs, as well as return the repaired Product to the Buyer at his own expense.
14. The Guarantor shall not be liable under the warranty in the event of:
 - 1) application by the Buyer or third parties of modifications that were not carried out or authorized by the employees of the Manufacturer.
 - 2) damage to the packaging or the product itself that were not reported on the date of receipt of the product.
 - 3) mechanical damage and damage resulting from improper or negligent assembly, use or storage, excessive overloading, operation in improper conditions or improper electrical installation.
 - 4) fortuitous events occurring after the release of the product, in particular caused by weather conditions, electromagnetic interference, electrical discharges or power surges.
 - 5) use of non-original materials or accessories for the product,
 - 6) failure to comply with the recommendations set forth in the price list and the Manufacturer's installation instructions,
 - 7) defective use of the Product, contrary to the Manufacturer's instructions,
 - 8) when defects, faults or damage to the Product result directly or indirectly from negligence, in particular resulting from failure to comply with the

requirements for regular inspection and servicing of the product, or negligence regarding the use and maintenance of the product in accordance with the instructions or directions for use,

9) defects, faults or damage to the product, the occurrence of which could have been prevented by the Buyer through proper maintenance and use of the product.

15. The warranty does not cover:

1) natural wear and tear of original components, parts and accessories caused by their normal use,

2) mechanical damage and defects caused by them,

3) damage resulting from assembly, changes or repairs to the product or its parts, made by persons other than those authorized by the Manufacturer; we recommend that you do not attempt to repair or replace the product without the Manufacturer's approval;

Otherwise, any complaints regarding a defect resulting from such actions that were not agreed upon with the Manufacturer shall be refused,

4) damage resulting from the use of spare parts or accessories other than those manufactured or used by the Manufacturer,

5) damage resulting from operation of the product contrary to its intended use,

6) maintenance and cleaning of the product, as well as replacement of fuses, batteries,

7) products discounted as being of incomplete value,

8) damage resulting from fortuitous events, in particular fire, flood, lightning, very low temperatures and other natural disasters,

16. In the event that a complaint is rejected as a result of an inspection conducted by the Guarantor, the cost of the inspection and the return of the goods shall be borne by the Buyer.

17. The Buyer may raise claims against the Seller under liability for defects only in the event that the following grounds are met jointly:

1) installation of the product was performed by authorized representatives of the Manufacturer,

2) The Buyer has a valid warranty card containing the following data:

(a) name and license number of the installer (this applies to installation of electrical equipment),

b) legible signature of the installer,

c) date and place of installation,

d) the Distributor's stamp.

3) product defects were promptly reported to the Manufacturer in writing, within the time limits specified in section 7 of the warranty terms and conditions,

4) the product has been installed and used in accordance with the manufacturer's instructions,

5) no alterations or repairs have been made to the product by persons not authorized by the Manufacturer.

18. The above provisions set out the aggregate liability of the seller for defects in the object of the contract.

The Manufacturer's warranty liability covers only defects arising from causes inherent in the item sold. Further claims of the Buyer, in particular claims under the warranty for product defects and claims for indirect losses, including lost profits of the Buyer, are excluded. Exclusion of the Manufacturer's liability under warranty for product defects does not apply to contracts concluded with consumers (as of January 1, 2021, it also does not apply to a natural person concluding a contract directly related to his business activity, when it appears from the content of the contract that it does not have a professional character for him, resulting in particular from the object of his business activity, made available on the basis of the provisions of the Central Register and Information on Business Activity).

19. Any damage caused by improper storage of the product, its improper handling and incorrect maintenance and other causes not attributable to the Manufacturer may be removed only at the expense of the Buyer. If the above-mentioned causes have triggered permanent changes in the quality of the product, the warranty shall be forfeited.

20. If, at the time of repair or replacement, the product is no longer manufactured by the Manufacturer or in the same version (form, colour, packaging, finish, etc.), the Guarantor is authorized to replace the same with a similar product.

21. In the event of an unjustified complaint, all related costs shall be borne by the Buyer.

22. The Guarantor shall have the right to demand payment of the cost of a service visit if the Buyer's complaint is not covered by the scope of this warranty.

Furthermore, the Buyer shall bear all other costs, including labor costs, product testing costs, as well as any other costs incurred in connection with the disassembly or reassembly of the product, and securing the product.

23. If the Guarantor has undertaken to repair the product in accordance with this warranty, the original warranty period relating to such product shall continue and shall be extended by the period during which the Buyer was unable to use the product due to the defect. If, in accordance with this warranty, the Guarantor has undertaken to replace the product (or its parts) or has made a substantial repair of the product, the new warranty period (relating to the product or part thereof) shall run from the date of delivery of the new product (or part thereof) or delivery of the replaced product.

24. The warranty shall be complementary to the Buyer's rights against the Guarantor based on generally applicable laws. The warranty shall not exclude, limit or suspend rights of the buyer who is a consumer (and as of 1 January 2021 also a natural person concluding a contract directly related to its business activity, when it follows from the content of this contract that it does not have for him a professional character, arising, in particular, from the object of its business activity, made available on the basis of the provisions on the Central Register and Information on Business Activity), resulting from the provisions on warranty for defects of the item sold.

25. The warranty shall apply in the countries to which the Manufacturer has sold its products directly.

26. The competent court for any disputes that may arise from this warranty shall be the court having jurisdiction over the Manufacturer's registered office.

27. In matters not covered by this warranty, the relevant provisions of the Civil Code shall apply.
